Attenuation

Absorption

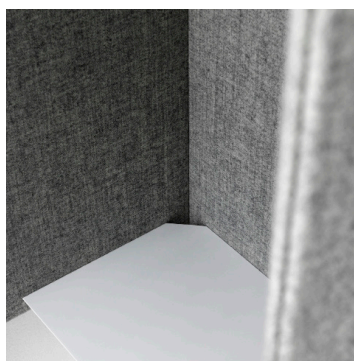

Domo wall booth

Design Stefan Borselius

Domo ljudabsorberande väggbås passar utmärkt för miljöer där behovet finns av att gå undan och ha en ostörd, tillfällig sfär.

Domo sound-absorbent wall booths are ideal in environments where there is an occasional need for a quiet, isolated area.

Båset finns både som höger- och vänsterställd variant. Väggar/tak är tillverkade av en textilklädd träram med ljudabsorberande fyllning. Dolda väggbeslag.

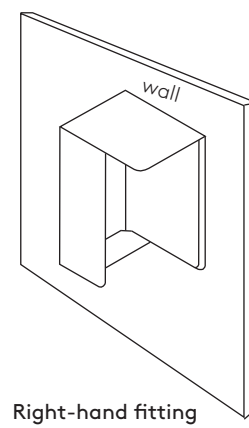

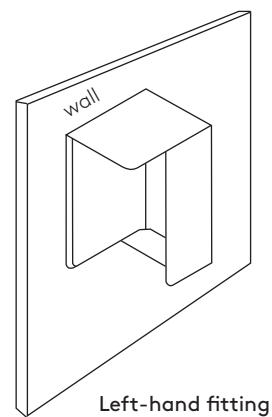

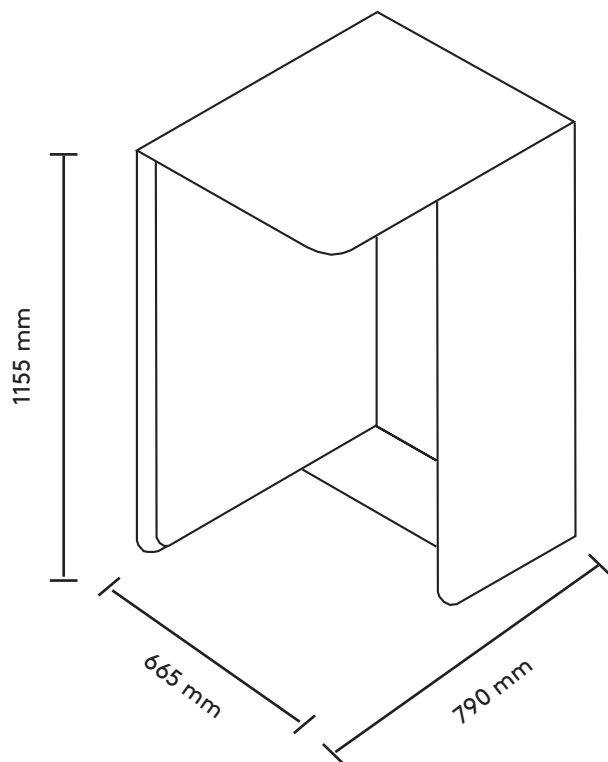

The booth is available for right or left-hand fitting. The walls/ceiling are made of an upholstered wooden frame with sound-absorbent filling. Concealed wall brackets.

Hylla i vitlackerad Mdf. Mått hylla: B 600 x D 300 mm. Hyllan har hål för kabelgenomförning.

Shelf in white-painted MDF. Measurements shelf: W 600 x D 300 mm. A discrete cable hole is placed in the corner.

Kombinera båset med öppna sittplatser i det aktivitetsbaserade kontoret så finns möjlighet till både öppen och ostörd kommunikation!

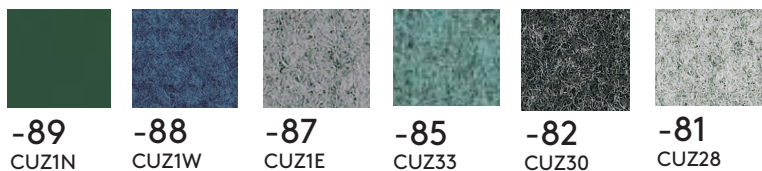

Combine the booth with open seating in an activity-based office to enable both open and private communication!

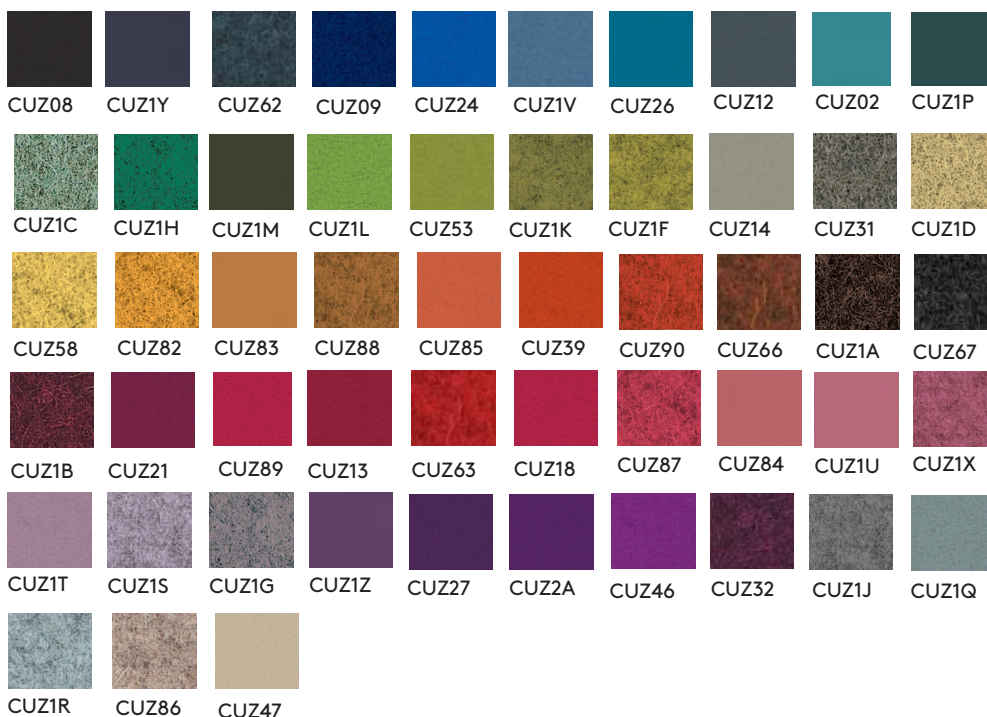

Färgval/Color Choices

Note: Available in other fabrics. Please see the pricelist for more information.
