Softline Mobile Desk Screen

Softline is a timelessly designed screen that absorbs noise effectively and creates a more pleasant soundscape. It is characterised by a design language of “little gestures” – like its rounded corners, which contribute to an inviting and friendly atmosphere. Softline is highly compatible with other furnishings and blends in beautifully in most settings. To add a personal touch, you can choose from a wide range of upholsteries.

Specifications

Softline mobile desk screen is used to create temporary screening at a large, shared table. The screen is built on an upholstered solid wooden frame with sound-absorbing filling. The free-standing legs are made from white painted MDF.
